A brush with art: colourful paintbrushes

Two eyes, a nose and a mouth: The smiley is the world's easiest painting and has now become a staple of the virtual world. All children need for simple drawings like these are the right creative tools – like the new colourful paintbrushes from Faber-Castell. They are made using the finest synthetic bristles and the rounded barrel is plastic. The large grip grooves that allow for a secure hold are a particular feature. The brushes are available in bright red, purple, green and yellow colours. Extra cute: the synthetic bristles are dyed to match the barrel colour.
